

LASER INGROWN NAIL REMOVAL

POST- OPERATIVE INSTRUCTIONS

1. The anesthesia will wear off in approximately 2 to 3 hours. Take Advil or Tylenol if necessary.
 2. Stay off of foot and keep elevated for the 1st day.
 3. **Redress the bandage on night of the surgery.**
 4. Showering is allowed on the morning following the procedure.
 5. The area of skin behind the nail may become reddened and some drainage is expected at the side of the nail. You may cover the area with a gauze sponge if the drainage is profuse.
 6. Apply Bactroban cream to the area two (2) to (3) times a day and rewrap with gauze until wound scabs over.
 7. No swimming or hot tubs for **one month**.
 8. Return to office 7 to 10 days after surgery.
